Servers

GlassFish server, Apache TomCat server

Cloud Services

AWS(Amazon Web Services)

EDUCATION

Diploma – Software Engineering Technician
Centennial College, Toronto, ON

September 2018 – April 2020

High School Diploma
Fletchers Meadow Secondary School, Brampton, ON

January 2016 – June 2017

RELATED WORK EXPERIENCE

Backend developer (Internship)

December 2020 - March 2021

Deskpal, Toronto, ON

- Pushed finished or updated code to GitHub repository
- Developed database object based on schemas, produced project deliverables in a timely manner
- built Rest API from database objects
- Collaborate with both front-end and back-end team to ensure consistency in product development

PROJECT EXPERIENCE

Robot Chatmate

May 2021

Desktop Application

Technical Tools: Python

- Successfully developed an automated reply app that allows the user to ask random questions and get answers, just as they would do with a person
- The algorithm is based on the words in the sentence structure, that is then analysed and creates a response

Bank Registration System

March 2021

Web Application

Technical Tools: Java, SpringMVC, MongoDB, HTML, CSS, JavaScript

- Successfully developed a banking registration system to allow clients the opportunity to virtually create an account with Green Panda Banking services.
- The form input is validated using JavaScript and a verification email is sent to the customer upon successful registration.

Student Management System

January 2021

Web Application

Yogendra Lakraj

Software Developer

14 Charleswood Circle
Brampton, ON L7A1Z1

Cell: 647-244-2903
e-mail: andylakraj@yahoo.com

Technical Tools: PHP, SQL, HTML, CSS, Bootstrap, JavaScript

- Successfully developed an Student Management system using PHP and MySQL
- The application allows college or university staff to efficiently manage students by performing CRUD operation on student records and also compare student gpa with attendance using a bar graph to determine any source of academic deterioration.

JSON Report Format

August 2020

Desktop Application

Technical Tools: C#, JSON

- Developer an application that allows user to select a csv document in their computer and convert the contents into JSON format.

Employee Management System

August 2020

Web Application

Technical Tools: J2EE, MySQL, SQL, HTML, CSS

- Successfully developed an Employee management System using Java Enterprise Edition and MySQL
- The app allows Employers to Login and perform CRUD operations to maintain their employee work orders, ensuring all changes are made in the database

Restaurant Online Reservation

April 2020

Desktop Application

Technical Tools: Java, MySQL

- Successfully implemented a computer program using java and MySQL, where the users can make or cancel a restaurant reservation
- The app featured with restaurant layout with graphics to assist customers select the most popular seats

Bank ATM application

April 2020

Desktop Application

Technical Tools : C#

- Successfully developed a simple desktop application that allows the user to deposit and withdraw funds from their chequing and saving account
- The user can withdraw funds from both accounts provided that there are enough funds

Online Quiz system

January 2020

Web Application

Technical Tools: Php, HTML, CSS

- Efficiently implemented a web application using php where the user answers several multiple-choice questions and the results are calculated after submission
- The Correct answers would also be generated after submission.

Restaurant Budget App

December 2019

Desktop Application

Yogendra Lakraj

Software Developer

14 Charleswood Circle
Brampton, ON L7A1Z1

Cell: 647-244-2903
e-mail: andylakraj@yahoo.com

Technical Tools: C#

- Efficiently developed a computer program using C#, which allows the user to input how much money they are willing to spend at a restaurant, with a recommended list of items within budget. The prices of all the items are totaled for the customer's convenience.

Cinema Point Of Sale Application Web Application

August 2019

Technical Tools: JavaScript, HTML, CSS

- Developed a point of sale web application for a cinema using javascript. In this application the user can select the viewing options for the customers which is Regular, 3D and Dbox with different price range.
- Designed different POS option to allow users select the movie from the dropdown menu and then how much tickets will be required; the seats are then selected and the total gets calculated for the customer.

COMMUNITY ENGAGEMENT

- Volunteered with the international department in Centennial College where I worked in a team environment to help new students
- Attending coding workshops and online bootcamps to familiarize myself with emerging technologies and to upgrade my skill in the technology
